

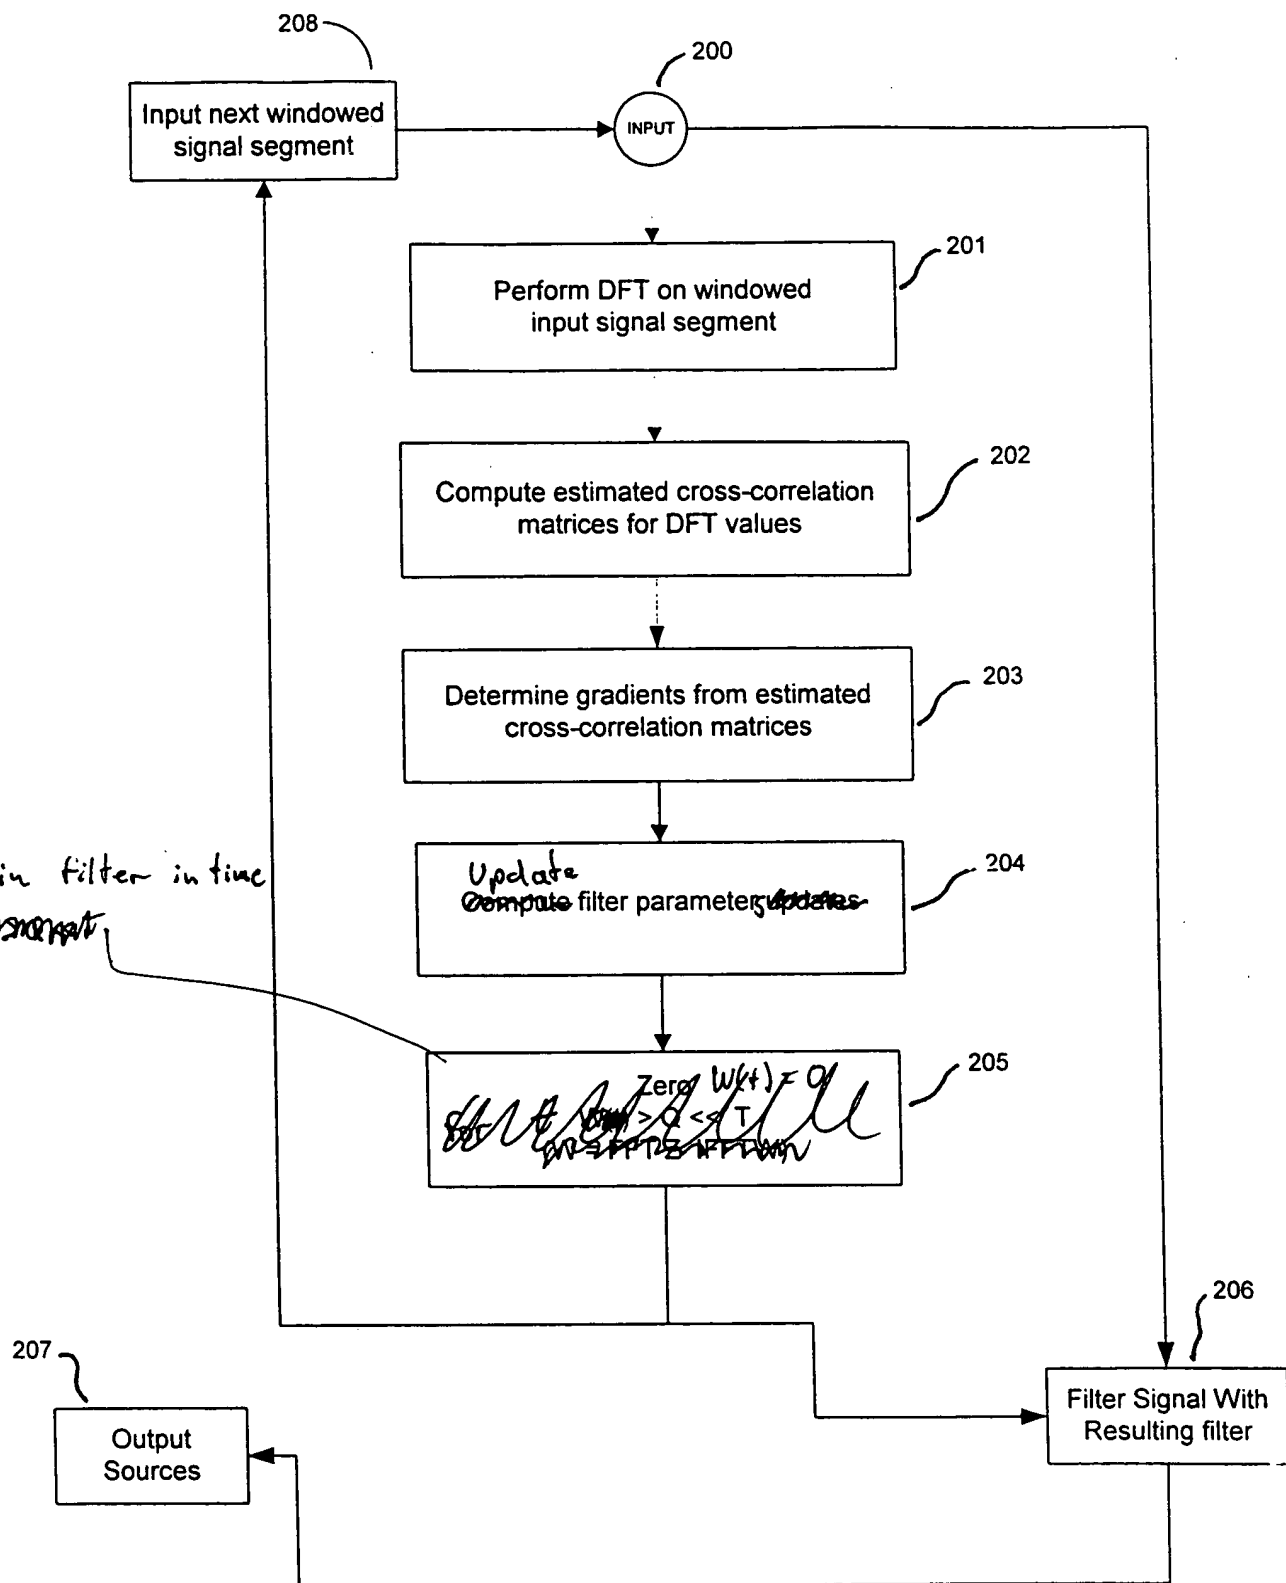

# FIGURE 1

**FIGURE 2**

Figure 1 is a graph with the vertical axis labeled  $W(V)$  and the horizontal axis labeled  $W$ . There are two curves: a dashed line labeled 302A and a solid line labeled 302B. Curve 302A starts at a high value on the vertical axis and decreases as  $W$  increases. Curve 302B starts at a low value on the vertical axis, increases as  $W$  increases, and then levels off at a higher value than where it started.
